# Focke-Wulf P.V "Volksjäger"

GERMAN WWII LITTLE ROCKET FIGHTER

## HISTORY.

This project, powered with a single Walter HWK109-509 rocket motor, resembles the Ta.183 "Huckebein", but is much smaller. Despite the similarity in names this design wasn't intended for the RLM's "Volksjäger" competition of September 1944, because the official specification called for the BMW.003 turbojet as the powerplant and the conventional retractable landing gear.

### FW.P.V "Volksjäger" data:

Length.....6m

Span.....5.8m

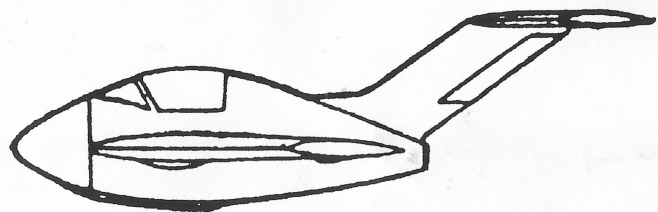

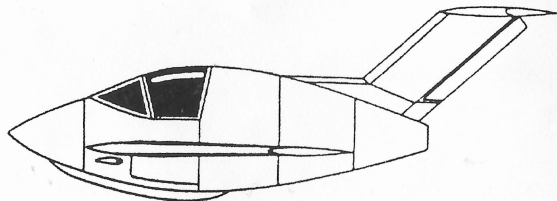

Weight.....2.130kg loaded

Armament.....2xMk.108 30mm guns

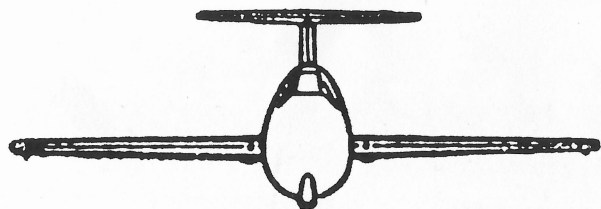

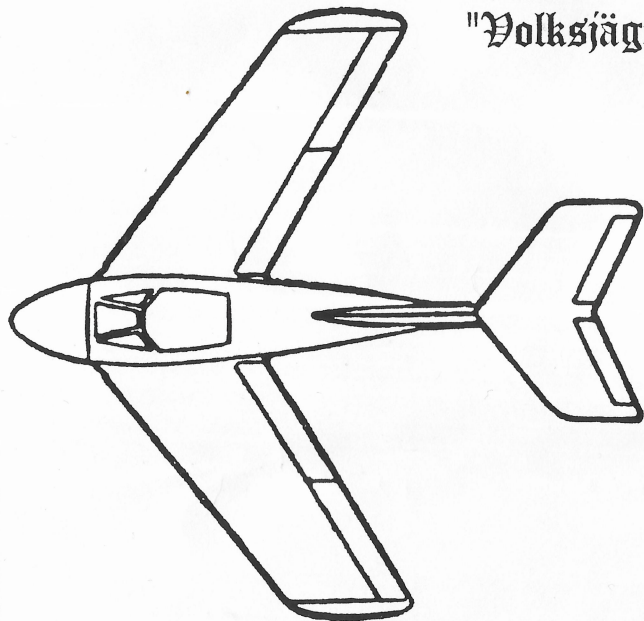

**MADE IN UKRAINE**

The kit contains: two fuselage halves, two wings, fin, stabiliser, transparent canopy.
