**Dassault Rafale M**

Die Dassault Rafale ist ein hochmodernes zweistrahliges Kampfflugzeug neuer Generation. Sie erfüllt die Anforderungen an Kampfflugzeuge des nächsten Jahrhunderts und vereinigt in einem Flugzeug alle Aufgabenfacetten, die sonst nur von vielen unterschiedlichen Typen bewältigt wurden. Die Rafale M bildet die Marine-Version für den Trägereinsatz und besitzt ein verstärktes Fahrgestell für den Katapultstart. Ausgerüstet mit zwei SNECMA M 88-2 Triebwerken (Schubleistung je 75 KN) erreicht die Rafale eine Geschwindigkeit von Mach 2. Aufgrund des großen Aktionsradius, der enormen Zuladungsfähigkeit sowie ihrer präzisen Feuerkontrolle und Überlebensfähigkeit bietet die Rafale außergewöhnliche Missionswirksamkeit. Außerdem ist sie weltweit das beste Kampfflugzeug, das gleichzeitig Bodenziel- und Luftverteidigungsaktionen durchführen kann. Die erste Serienmaschine wird 1999 von der französischen Marine in Dienst gestellt.

Dassault Rafale M

The Dassault Rafale is a new-generation ultra-modern twin-jet combat plane. It meets the combat requirements for the next century, combining in a single plane the multiple roles that otherwise would be carried out by many different types. The Rafale M is the carrier-borne naval version equipped with a reinforced undercarriage for catapult launching. Equipped with two SNECMA M 88-2 engines (each with 75 KN thrust) the Rafale reaches a speed of Mach 2. Its long range, enormous load-carrying capacity, precision fire control and survivability gives the Rafale exceptional mission effectiveness. In addition it is the best combat plane in the world that can engage in simultaneous ground attack and air defence actions. The first production-plane goes into service with the French navy in 1999.
