PC-9

THE EYE IS OPTION ON THE 77 SQN PC-9

- FS-26118 DARK SEA GREY SEMI GLOSS
- FS-37038 FLAT BLACK
- EXHAUST TESTORS B-1406

INSTRUCTIONS:

Applying decals

1. When you are ready to start applying the decals, we recommend that you cut as close to the item as possible to achieve the best result.
2. Soak the decal in warm water to which a drop or two of dishwashing liquid has been added. Leave the decal for 11 seconds and then slide the decal off the paper and onto the model.
3. Once on the model and in the right position, lightly press down on the decal with a dry tissue to soak up the excess water. You may then use a decal setting solution .
4. Once the decal has set and is dry, you may then trim off any excess clear decal film if you wish to do so.

Notes:

These decals are still raw and do not have a clear varnish finish on them. This is to prevent them from cracking and turning yellow in storage. However, there is a thin film of oil on them so before you apply any clear lacquer to the applied film, we recommend that you give them a light wipe over with a damp soapy cloth. Then you can apply lacquer to your model.

Warning: When applying film to a model be very gentle as the decal film is very thin and may tear if mistreated.

We hope that you enjoy these decals.

If you experience difficulties with the decals please e-mail Peter Mahoney at peter@hawkeyemodels.com.au
