This detail set is manufactured from photo-etched brass sheet and is meant for use on the 1/72nd scale Airfix 5-29 Buccaneer model kit.

- Use a sharp modelling knife or scalpel to separate components ensuring this is done on a firm surface as near to the part as possible. Tag screws can be cleaned by holding part firmly in pliers and using a fine file. To hold part, support up to line of file and move in one go, housing part in pliers and using blade of screwdriver to hold.
- For assembly use superglue or epoxy. Only use epoxy to fix brass to clear parts. Before painting fully define part by cleaning in an alcoholic liquid and rinsing in clean water. Dry parts thoroughly and prime with self-etching primer, or white or grey enamel.
- Position of parts in diagrams are for guidance only. Colouring and final positioning should be checked against reference material. We recommend Airbrush No's available from E.O. Models.

Alternative seats such as manufactured by Harrier Airclub can be used.

Back parts 17, 19 & 20 with black plasticard.

Twist blades slightly the same way then glue ring in slots.

Kit part A

Kit part B

Kit part C

Kit part D

Some details omitted for clarity.
